

Regarding 03-104, the Broadband over Powerline initiative,
I just want to express my concerns with possible interference
my shortwave and ham stations. Much has been written about this interference,
which I feel would be a great disservice to not only
a wonderful way of listening to the world talk, but would seriously reduce the
known effectiveness of these methods of communication during a time of crisis. I
thought one of the FCC charters is to guard against interference so that
everyone, commercial and otherwise, can participate in the airwaves. Thanks for
listening!
